

Memorandum of Understanding

This document briefly describes the agreements for utilization of proprietary/non-public simulation data created by the Besla Group within collaborative projects and publications external to the Besla Group.

The Data Sets:

- SMC stellar particle data (3D positions and velocities) from Model 1 and Model 2 simulations described in Besla+2012 MNRAS 421 and Besla+2013 MNRAS 428.

External Collaborators Using the Data Sets: Camila Navarrete, Akshara Viswanathan

Immediate Purpose: To facilitate proposal with the Pristine Collaboration

Expected Publication: Navarrete+2023/2024

Data Usage Agreement: The listed Data Sets are to be utilized only for the purpose of simulated stellar stream comparison to observational data in the listed Publication/Proposal. After publication, the Data Sets are to be deleted by all External Collaborators. The Data Sets are not to be shared outside the listed External Collaborators. Data Sets can be re-requested from G. Besla for future projects.

Acknowledgements/Co-Authorship: Please list G. Besla and H. Rathore in the acknowledgements for the expected publication. Co-authorship is not expected for this publication.
